# Guideline for running Tank 1990

Step 1: Download .zip file
Step 2: Extract the .zip file
Step 3: Open project with <u>Intellij Idea</u> (recommended) or <u>VSCode</u>
**Step 4:** Specify JDK version (minimum 1.8.0)
Step 4: Open folder: src / jsd / project / tank90 / main /

**Step 5:** Run the program
- <u>With Intellij Idea:</u> Right click Main.java and click Run Main.main()

- <u>With VScode:</u> Install Java extensions then click run button at the top right corner

Walkthrough

This is the menu when the player first enters the game. After clicking "Play", the game starts.
Clicking to "Score" to show score history and "Exit" to turn off the game.

Controls

A: Move left
S: Move down
D: Move right
W: Move up

ESC: Pause or exit
SPACE: Fire bullets

The right panel displays the number of enemies remaining to defeat in order to complete the stage. It also shows your total remaining lives, which persist across all stages without resetting. The number next to the flag indicates the current stage. Compete with friends to see who can finish all the stages first!

The left panel displays Guide how to play, high score and current score.

Enjoy your adventure in Battle City!
